<http://www.openoffice.org>

The screenshot shows the OpenOffice.org website homepage. At the top left is the OpenOffice.org logo with the tagline "the free and open productivity suite". On the top right, there are links for "Language Projects", a user status indicator "You are not logged in. Register or Log In", and a search bar. Below the header is a navigation menu with buttons for "Home", "News", "Download", "Support", "Projects", "My Pages", and "About". The main content area is divided into two columns. The left column contains five links, each with an icon and a title: "I want to learn more about OpenOffice.org", "I want to download OpenOffice.org", "I need help with my OpenOffice.org", "I want to do more with my OpenOffice.org", and "I want to participate in OpenOffice.org". The right column contains two news items: "OpenOffice.org 3.0.1 released" and "A Home for Templates".

GIMP is the GNU Image Manipulation Program. It is a freely distributed piece of software for such tasks as [photo retouching](#), image composition and [image authoring](#). It works on many operating systems, in many languages. ([more...](#))

This is the official GIMP web site. It contains information about downloading, installing, using, and enhancing it. This site also serves as a distribution point for the latest releases. We try to provide as much information about the GIMP community and related projects as possible. Hopefully you will find what you need here. Grab a properly chilled beverage and enjoy.

GSOC2011 IS OVER

2011-09-17

Google Summer of Code 2011 is over, and all of our students have successfully finished their respective projects. All of the code is available in Git repositories, but not all of it is going to be part of the next released versions of GEGL and GIMP. Here is why.

Both new tools, [Seamless Clone](#) and [Warp Transform](#), as well as new size entry widget are too late to become part of 2.8. We are planning to make them part of 2.10, when they are better tested for reliability and usability. The OpenCL project needs more work to become part of GEGL's main development branch. However the project to port more [GIMP filters to](#)

Free Video Converter

[Overview](#) | [Features](#) | [Download](#) | [Tutorial](#)

iWisoft Free Video Converter is a powerful, high-quality freeware video converter.

It can easily convert video/audio between all popular formats. It can convert video/audio from one format to another, rip audio from video, convert video to image series, animated gif.

The free video converter provides you optimized output profiles, you can easily convert video/audio for iPod, iPhone, PSP, Zune and many other digital devices.

You can adjust codec, bit rate, frame rate, video size, audio channel, sample rate, audio volume etc. for an output format.

And the video converter provides many useful video editing functions, like cropping, trimming, merging, adding watermark, subtitle etc.

Key Features

- Convert all popular video formats, including HD video.
- Rip audio from video.
- Convert video to animated GIF.
- Optimized profiles for many digital devices.
- Adjust format parameters.
- Merge video.
- Trim video.
- Crop video.
- Add watermark on video.
- Support .srt subtitle.
- [And many more](#)

WEFT QDA

Weft QDA is an easy-to-use tool to assist in the analysis of textual data such as interview transcripts, written texts and fieldnotes. It includes a number of fairly standard CAQDAS features (follow links to see screenshots):

- Import documents from plain text or PDF
- **Character-level coding** using categories organised in a tree structure
- **Category and document memos**
- **Retrieval of coded text** and "coding-on"
- **Simple coding statistics**
- **Fast free-text search**
- **Combine coding and searches using boolean queries:** AND, OR, AND NOT
- **"Code Review"** to compare the coding of multiple categories
- Export to HTML and CSV formats
- Single-file (*.qdp) project format
- Available **FREE** on Windows & **Linux**, under a public domain licence

[Home](#) | [Prices](#) | [Features](#) | [Survey Templates](#) | [Company](#) | [Resources](#) | [Support](#)

Step 1: Create Surveys

Using just your browser you can easily create the most complex surveys.

eSurveysPro.com will help you design your surveys with our easy to use survey editor. We offer you [18 question types](#) and the possibility to control the flow of your surveys.

Step 2: Collect Responses

Collect responses by sending email invitations or by placing a link to your survey on any website.

We offer a powerful mailing system that will help you send and track email invitations to your surveys. Alternatively, you can just place a link anywhere on the web to your survey.

Step 3: Analyze Results

View your results as they are collected in real-time using our reports.

Use our reports to summarize and analyze your responses. Dig down to a specific answer. Export your data if you want to process it offline using tools like Excel or SPSS.

SAFE AND SECURE DATA

eSurveysPro.com is hosted in a [secure location](#). Our software infrastructure is updated regularly with the latest security patches and permanently tested.

About:

Freeware Home is an indexed collection of FREE programs commonly found on the Internet around the globe that match the following criteria:

- » **freeware** - Free software, often written by enthusiasts and distributed by users' groups, or via electronic mail, local bulletin boards, etc.
- » **open source** - Term appeared in March 1998 following the Mozilla release to describe software distributed in source under license that allows users to freely use, modify, and redistribute, the code.
- » **shareware** is **NOT** free. There is one form of shareware that is free for non-commercial use. It meets our definition of Freeware.

Calculating Basic Statistical Procedures in SPSS

Calculating Basic Statistical Procedures in SPSS: A Self-Help and Practical Guide to Preparing Theses, Dissertations, and Manuscripts, is authored by [John R. Slate](#) and [Ana Rojas-LeBouef](#) from Sam Houston State University and endorsed by the [NCEA](#). The textbook was written to make statistical analysis less threatening and less anxiety-producing than many persons find it to be. The authors have written this textbook in hopes of facilitating individuals' success in using SPSS for their statistical analyses; in interpreting the SPSS output properly; and in writing statistical results correctly.
