La integridad y la conducta responsable en la investigación comprende el conocimiento y atención en varias áreas:

Principios Éticos: Informe Belmont

Respeto por las personas

- Autonomía individual
- Protección a las personas con limitada autonomía

Beneficencia

- No hacer daño.
- Maximizar los beneficios y minimizar los daños

Justicia

- Distribución equitativa de los riesgos y beneficios de la investigación entre los voluntarios y la población a beneficiarse de los resultados.

Principios éticos: Declaración Bioética y Derechos Humanos de la UNESCO

- ✓ Dignidad humana y derechos humanos
- ✓ Beneficios y efectos nocivos
- ✓ Autonomía y responsabilidad individual
- ✓ Consentimiento
- ✓ Personas carentes de la capacidad de dar su consentimiento
- ✓ Respeto de la vulnerabilidad humana y la integridad personal
- ✓ Privacidad y confidencialidad
- ✓ Igualdad, justicia y equidad
- ✓ No discriminación y no estigmatización
- ✓ Respeto de la diversidad cultural y del pluralismo
- ✓ Solidaridad y cooperación
- ✓ Responsabilidad social y salud
- ✓ Aprovechamiento compartido de los beneficios
- ✓ Protección de las generaciones futuras
- ✓ Protección del medio ambiente, la biosfera y la biodiversidad

Ficha técnica de la película

- País: Estados Unidos
- Año: 2015
- Director: Kyle Patrick Alvarez
- Música: Charles Bernstein
- Guión: Tim Talbott, Philip Zimbardo (libro)
- Intérpretes: [Billy Crudup](#), [Michael Angarano](#), [Moises Arias](#)
- Duración: 122 min
- Género: drama/ histórico

Estudio de la cárcel de Stanford

- Investigador: Philip Zimbardo
- Propósito: entender el proceso de identificación de roles y del desarrollo de las normas y expectativas sociales en un ambiente carcelario simulado.
- Año del estudio: 1971
- Sujetos: 24 hombres universitarios de clase media
- Financiamiento: Marina de los Estados Unidos

PLEASE ANSWER ALL QUESTIONS USE ADDITIONAL PAGES AS NECESSARY

I. PROCEDURES
Please describe those research procedures affecting the subject, as they are to be experienced by the subject. Please be concise, but clear and graphic.
A simulated prison will be set up in the basement of Jordan Hall for about one week this summer. Student volunteers will be randomly assigned to be either guards who work an 8-hour shift or prisoners who live in for the duration of the study. There will be no other experimental variations. The study is an observational one of the development of norms, rules and expectations as a consequence of assignment of a label to the individual. Prisoners will have work assignments (e.g., cleaning the area), chance to study, some recreation (movies). They will however be led to believe that they cannot leave, except for emergency reasons. Medical staff will be available to assess any request to terminate participation.

II. INFORMED CONSENT
It is of major importance that voluntary informed consent for the subject to participate in the research be obtained. If the subject may not legally give consent himself, informed consent must be obtained from the parents or guardian.
A. Please explain the methods of recruitment and obtaining of informed consent.
1) Paid volunteers recruited from AD in Stanford Daily.
2) See attached Information Form given to all volunteers.
B. Is a risk of physical, emotional or other harm to the subject involved? yes ☒ no ☐ If yes, written consent must be obtained and held on record. Please attach a copy of the consent form to be used.
There may be some potential emotional stress created by this temporary loss of freedom among the prisoners and by the need for surveillance and control among the guards. We will maintain careful observation of both groups, with professional staff living in adjacent to the experimental "prison cells." Subjects will be notified of the potential stressfulness of the experience and during a preliminary interview will be encouraged not to participate if they are at all anxious about

III. EFFECTS
A. Is deception to be used at any point? ☒ yes
If yes, please complete 1-3 ☒ no

1. Please describe the deception.
2. Does deception affect the informed consent? ☒ yes
If yes, please explain. ☒ no
3. Please describe the debriefing procedures. If none, please explain the lack.
B. Will physical activity be required of the subjects? ☒ yes
If yes, please describe. ☒ no
Exercise, cleaning their rooms and the halls, number counts.
C. Will the subject be submitted to humiliation, harassment, irritation, or public or private embarrassment ☒ yes ☐ no If yes, please explain why this is necessary and describe debriefing or other procedures for offsetting any negative effects of such experience.
Prison subjects' privacy will be minimized. Prison subjects will have to wear prison uniform. Prison subjects will have to follow orders and rules. Prison subjects will be discouraged from quitting. These negative effects are among the major anticipated side effects of being in a prison, and form an essential possible outcome of this study.
D. Will personality inventories, tests or questionnaires which produce scores on so-called "personality variables" be used? ☒ yes ☐ no perhaps ☐ If yes, please describe why these will be used, and the manner of testing. Please indicate whether such scores or their indications will be made known to the subject, and if so, what explanations or accompanying information will be given him.
We probably will use personality inventories in subject selection (to exclude extreme responders and deviants—since we want the guards and prisoners to be as homogeneous as possible initially).
We may want to retest at the end of the study to note any transient changes in self-reports.
(continued on supplemental page)

IV. CONFIDENTIALITY
Please explain how confidentiality and privacy of results will be preserved, especially with regard to III, D.
All information gathered on tests or interviews will be coded, with a master list available only to the principal investigators. Release forms for any film footage will be obtained from each subject before such films are shown.

II. INFORMED CONSENT
B. (continued)
any negative reactions which could emerge. A background questionnaire (enclosed) will help us screen out any volunteer with a history of emotional disturbance. In addition each volunteer will be interviewed by a psychologist and the taped interview will be available for analysis. A copy of the subject consent form is also enclosed.

III. EFFECTS
D. (continued)
Subjects will be given all the information we have available at the end of the study—personal information to be provided in confidential sessions; general information in group sessions.

Consentimiento

CONSENT

Prison Life Study
Dr. Zimbardo
August 1971

(date)

(name of volunteer)

I, _____, the undersigned, hereby consent to participate as a volunteer in a prison life study research project to be conducted by the Stanford University Psychology Department.

The nature of the research project has been fully explained to me, including, without limitation, the fact that paid volunteers will be randomly assigned to the roles of either "prisoners" or "guards" for the duration of the study. I understand that participation in the research project will involve a loss of privacy, that I will be expected to participate for the full duration of the study, that I will only be released from participation for reasons of health deemed adequate by the medical advisers to the research project or for other reasons deemed appropriate by Dr. Philip Zimbardo, Principal Investigator of the project, and that I will be expected to follow directions from staff members of the project or from other participants in the research project.

I am submitting myself for participation in this research project with full knowledge and understanding of the nature of the research project and of what will be expected of me. I specifically release the Principal Investigator and the staff members of the research project, Stanford University, its agents and employees, and the Federal Government, its agents and employees, from any liability to me arising in any way out of my participation in the project.

Witness: _____

(relationship to volunteer)

Has Professor Zimbardo ever apologized for the suffering that occurred?

A: Yes. In his book *The Lucifer Effect*, Professor Zimbardo wrote: "I was guilty of the sin of omission -- the evil of inaction -- of not providing adequate oversight and surveillance when it was required... the findings came at the expense of human suffering. I am sorry for that and to this day apologize for contributing to this inhumanity." (pp. 181, 235)
