La dinámica de trabajo en la versión nueva de Mendeley

Funciones

- Construir su biblioteca (abrir carpetas (Collections) y grupos (Groups) e invitar colegas:
 - Importar a Mendeley archivos en PDF, MP4 u otros formatos de fuentes de información electrónicos y sus metadatos
 - Agregar manualmente y guardar (función *Add file* o *Add new*) archivos en PDF, MP4, etc.
 - Crear y/o guardar conjuntos de datos primarios de investigación (*datasets*)
 - Curar los metadatos de las fuentes de información en su biblioteca
 - Leer, subrayar y tomar notas en los archivos guardados
 - Citar y hacer referencias bibliográficas en sus manuscritos.
- Buscar información sobre su tema de investigación en la base de datos de Mendeley
- Buscar conjuntos de datos primarios para investigación en Mendeley Data
- Buscar ofertas de trabajo

Agregar archivos en su biblioteca en ambas versiones

The screenshot shows the Mendeley Reference Manager web interface. The browser address bar displays 'mendeley.com/reference-manager/library/all-references'. The page title is 'Library' and the user is identified as 'Snejanka Penkova'. A red box highlights the '+ Add new' button in the top left, which has opened a dropdown menu with the following options: 'File(s) from computer', 'Add entry manually', and 'Import library >'. Below the menu, the 'All References' table is visible, listing various academic entries with columns for Authors, Year, Title, Source, Added, and File. The table contains 15 entries, including titles like 'Una aproximación al impacto de la investigación cubana sobre alfabetización inform', 'Information Literacy Competency Standards for Higher Education', and 'Carl Scholarly Communications Roadmap'.

The screenshot shows the Mendeley Reference Manager interface. On the left, a sidebar lists various library groups, with 'Green roofs' selected. The main area displays a table of references with columns for 'AUTHORS', 'YEAR', and 'TITLE'. The reference 'Establishing green roof infrastructure through environmental policy instruments' by Carter T, Fowler L (2008) is highlighted. On the right, a detailed view of this article is shown, including the title, author, journal information, and an abstract. A red circle highlights the article details panel.

ABSTRACT

Traditional construction practices provide little opportunity for environmental remediation to occur in urban areas. As concerns for environmental improvement in urban areas become more prevalent, innovative practices which create ecosystem services and ecologically functional land cover in cities will be in higher demand. Green roofs are a prime example of one of these practices. The past decade has seen the North American green roof industry rapidly expand through international green roof conferences, demonstration sites, case... [Read more](#)

Introducción

El sistema tradicional de evaluación de la calidad de una publicación científica (un artículo de revista, por ejemplo) se ha basado, fundamentalmente, en el recuento de las citas que ha generado. Fue Eugene Garfield (1955) quien propuso los índices de citas como un sistema que serviría para ayudar a los autores y a los lectores a encontrar artículos de una determinada temática. Se trató, sin duda, de una gran innovación. Posteriormente, con la creación del Institut for Scientific Information (actual Web of Science) y los Journal Citation Reports, el análisis de citas adquirió mucha notoriedad y cambió su orientación, pasando de priorizar la recuperación de información (encontrar artículos de una temática) a centrarse en la evaluación de las revistas (saber en qué revista publicar, a partir del factor de impacto que se calculaba para cada una de ellas). El uso indiscriminado y abusivo de esta aplicación ha sido criticado por el propio Garfield en diversos artículos (GARFIELD, 2006; 2016).

Dos de los indicadores más conocidos son el factor de impacto¹, que se aplica a revistas, y el índice h², que sirve para medir la trayectoria de un autor. Esta forma de medir el impacto ha tenido muchas críticas, en especial desde las ciencias humanas y sociales (CHS), porque no se ajusta a los hábitos de publicación y citación de los investigadores de estas áreas. Hay autores (BORDONS; FERNÁNDEZ; GÓMEZ, 2002; ARCHAMBAULT; VIGNOLA-GAGNÉ; CÔTÉ *et al.*, 2006) que recogen algunas de las principales limitaciones: la cobertura de revistas no refleja bien la diversidad de idiomas y países (en la selección de revistas fuente para las citas existe un predominio de los títulos en inglés, mientras que la investigación en CHS está muy "regionalizada" y utiliza también otros idiomas), el periodo de dos o tres años para el cálculo del factor de impacto es muy corto para recoger

A pesar de estas consideraciones, la facilidad de cálculo de estos índices y su pretendida objetividad explican que hasta ahora hayan sido la principal medida para evaluar la calidad de las publicaciones científicas.

De todas formas, estas limitaciones evidentes impulsaron, desde hace ya unos años, la búsqueda de nuevas métricas para evaluar las publicaciones científicas. Además de las citas se podrían tener en cuenta también otros indicadores cuantitativos como los usos (número de visualizaciones y de descargas de los artículos) y también la presencia en las redes sociales y académicas (cuántas referencias aparecen en Twitter, blogs, etc.). Se denominaron alométricas a este conjunto de indicadores que ofrecen una visión complementaria a la rigidez de las citas. Sus datos son del máximo interés para los autores, los lectores y también para los financiadores de la investigación, ya que miden el uso y el eco social de las publicaciones científicas.

En este texto vamos a analizar los antecedentes y alcance de las alométricas, las fuentes y los indicadores que utilizan, así como sus aplicaciones en el ámbito de las revistas científicas y en bases de datos académicas. En segundo lugar, se llevará a cabo una valoración de sus puntos fuertes y débiles, las aportaciones para la evaluación de publicaciones en ciencias humanas y sociales, así como su consideración como un elemento destacado de los nuevos modelos de evaluación de publicaciones científicas que se están configurando.

Typologization of the Baltic region countries by the level of scientific and technological development

Danil Azhinov, Tatiana Lapshova

Published 8 November 2022 | Mendeley Data

The data set consists of indicators and their derivatives on the population, the number of researchers, including by activity sectors, R&D financing, as well as by activity sectors in ten countries of the Baltic region. The analysis of these indicators allows us to identify the types of the Baltic region countries according to the level of scientific and technological development and to reveal patterns of their development.

Will Mendeley Desktop stop working on September 01, 2022?

Last updated on August 30, 2022

Mendeley Desktop will still work after this date. While new downloads of Mendeley Desktop will no longer be available from September 01, 2022, your existing installation will not be affected. If you installed Mendeley Desktop before September 01, you will still be able to sign in to Mendeley Desktop and use it as normal.

From September 01 only Mendeley Reference Manager desktop will be available to download.

There is no need to uninstall Mendeley Desktop before installing Mendeley Reference Manager. Both can be installed on the same machine. Remember to sync when using Mendeley Desktop; Mendeley Reference Manager will sync automatically.

How do I migrate from Mendeley Desktop to Mendeley Reference Manager?

Last updated on August 30, 2022

When migrating to Mendeley Reference Manager there is no need to uninstall Mendeley Desktop. Both can be installed on the same machine and you can switch between the two if you want. Remember to sync when using Mendeley Desktop; Mendeley Reference Manager will sync automatically.

- Mendeley Desktop users must sync their libraries for it to be available in Mendeley Reference Manager; [this FAQ](#) gives instructions on how to ensure files are also synced.
- [Download Mendeley Reference Manager](#) or visit [Mendeley Reference Manager web](#). Mendeley Reference Manager is the same on web and desktop.
- Sign in with the same account that was used for Mendeley Desktop.
- Your personal library, including collections, as well as any groups you have created or are a member of will automatically sync.

Mendeley also has a new citation tool – Mendeley Cite – that should be downloaded separately. Mendeley Cite can be downloaded from Microsoft AppSource.

Any in-progress documents started with the citation plug-in for Mendeley Desktop [must be converted](#) before they can be continued with Mendeley Cite.

Mendeley Cite will automatically detect if a document has citations added with the Mendeley Desktop Citation plug-in and prompt the user if they would like to convert. We advise everyone to save a separate copy of the document before converting.

What browsers and operating systems are supported for Mendeley products?

Last updated on June 22, 2022

Operating Systems

Web Browsers

We generally support the last 2 major versions of evergreen browsers:

- Chrome
- Firefox
- Microsoft Edge
- Safari

Even if a browser is not supported, Mendeley Reference Manager on the web might still operate to a satisfactory level on it, however we do not offer full support or fixes for issues on other browsers.

Cite as you write. Generate citations and bibliographies and change your citation style.

Mendeley Cite speeds up the process of referencing when writing, giving researchers the tools to quickly and easily insert references from their Mendeley library directly into their Microsoft Word document.

The Mendeley Cite add-in for Word, which can be used without having your reference manager open or even installed, allows you to insert individual or multiple references and automatically create a bibliography from the citations you've inserted.

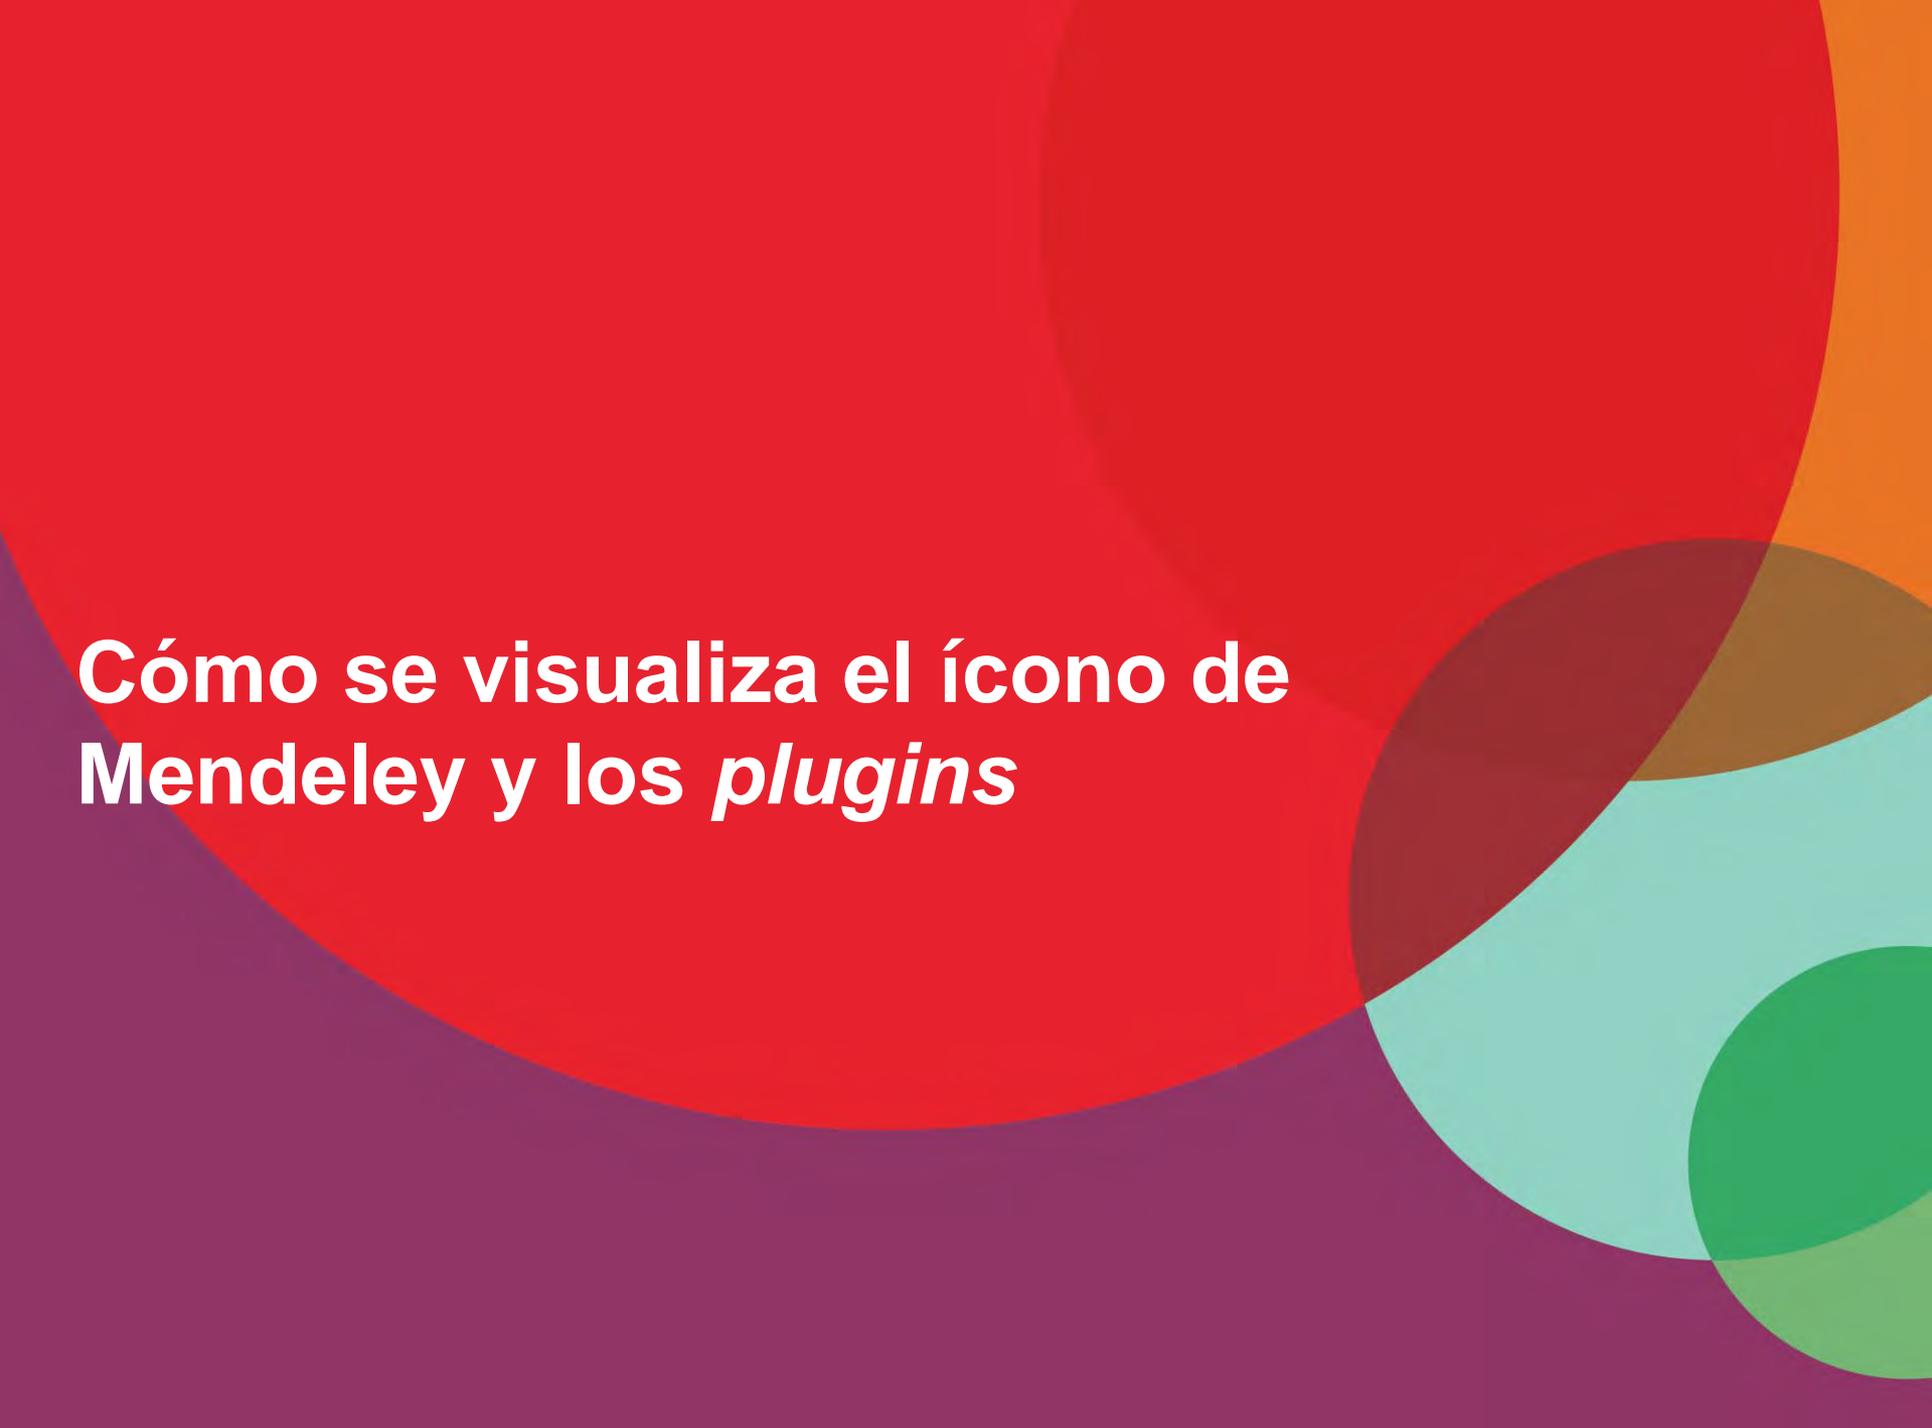

Features:

- Once you sign in to Mendeley Cite, your Mendeley library is downloaded from the cloud, so you don't need to have Mendeley Desktop or Mendeley Reference Manager open or even installed to use it
- Search for references in your Mendeley library and insert them easily into the document you're working on
- Select and insert individual or multiple references at once
- Create edits to your references within your citations
- Create a bibliography from all the references you've cited
- Change to any of your preferred citation styles, including custom styles
- Easily convert your documents made with Mendeley Desktop citation plugin to work with Mendeley Cite

To use Mendeley Cite you'll need a free Mendeley account, available from www.mendeley.com. You can also set up an account through the add-in.

Is Mendeley Cite available for LibreOffice?

Last updated on January 25, 2021

Mendeley Cite is currently only available for MS Word. LibreOffice users can continue to use the Mendeley plug in for LibreOffice available with Mendeley Desktop.

However, users on Linux based machines can access Mendeley Cite using a web browser via Word Online. You will be able to install and access Mendeley Cite if you sign in to the free Microsoft Word service, [Word Online](#) , using a personal Microsoft account. This way, you can still access Microsoft Word and Mendeley Cite.

How do I remove the Mendeley code from a document in Mendeley Cite?

Last updated on February 26, 2020

Before finishing a document, you can remove the Mendeley fields by 'flattening' the document.

How

1. Highlight the contents of the document using **Ctrl + A** (Windows) or **Cmd + A** (Mac).
2. Right click on a Mendeley content control, such as a **citation** or a bibliography.
3. Select '*Remove Content Control*'.

This will:

- Remove the code that powers the Mendeley Fields.
- Convert the entire document to plain text.
- No longer automatically update your bibliography to include new references, so make sure you're totally happy with your references before undertaking this step.
